**Key words.** binaries: eclipsing – stars: fundamental parameters – stars: early-type – stars: evolution – stars: oscillations – errata, addenda

Some misprints have been identified in the original paper (Yakut et al. 2007). It concerns the labels in Figs. 1 and 5 and some of the wording in Sect. 6. The following corrections should be applied:

- the labels “P” and “S” in Fig. 1 should be interchanged;
- the labels “Primary” and “Secondary” in Fig. 5 should be interchanged;
- in the third paragraph of Sect. 6, “\(v \sin i = 19 \pm 1 \text{ km s}^{-1}\) for the primary and \(v \sin i = 31 \pm 2 \text{ km s}^{-1}\) for the secondary” should read “\(v \sin i = 19 \pm 1 \text{ km s}^{-1}\) for the secondary and \(v \sin i = 31 \pm 2 \text{ km s}^{-1}\) for the primary”.

All other reported results and the labelling of the binary components in the other sections of the paper are correct.

**Acknowledgements.** The authors acknowledge Dr. Simon Albrecht for having pointed out these inconsistencies in our text to us.
