Correction: Energetics, barriers and vibrational spectra of partially and fully hydrogenated hexagonal boron nitride

J. M. H. Kroes,* A. Fasolino and M. I. Katsnelson

We would like to inform the reader of a correction that needs to be made to our previous publication. The bending rigidity, $\kappa$, is incorrectly reported to be 1.26 eV on page 19364 and in a label in Fig. 9. The correct value is 0.96 eV.

Thus the correct sentence should read “For pristine h-BN $\kappa$ is found to be 0.96 eV.”

The correct version of Fig. 9 is given below.

Fig. 9  Dependence of the ZA mode for pristine h-BN near $I$ (M direction) on $q$ (left) or $q^2$ (right). In black, results for the optimized cell showing $\omega \propto q^2$. The red curve shows the $\omega \propto q$ behaviour in a 0.2% larger cell.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
